### **Contact Details (including Town and County)**

**Phone: 045 521123    Mobile: +353 85 2721551**

Email: Cillian.molloy@yahoo.ie

Linkedin: linkedin.com/cillianmolloy

## **PROFILE**

I am a graduate of the Institute of Technology Tallaght, Dublin with an Honours Degree in Computing Science. I have made several small software applications during my time in College that were for personal learning and experience. I am open to criticism, and I can use the feedback to improve my role in the organization and in future projects.

## **CAREER HISTORY**

### **Car Park Security, Irish National Stud and Gardens**

**15/6/2015 -**

#### **Current**

- Insert further details of your key duties and responsibilities. Remember to use active verbs including sold, solved etc.

#### Achievements:

During my time working in the Irish National Stud in 2017, on days with many incoming customers, I had to direct cars to the three parking areas with no staff or security to aid me. Through careful placement of vehicles and knowledge of how much space was available, I was able to ensure that customers would be able to park and enter the tourist grounds. I was later informed that through my actions, I had helped the stud make a turnover larger than the season of 2016.

#### EDUCATION & TRAINING

##### RESULTS PENDING

University name TBC/5/2018

Games and Apps Designer

Carlow PLC 12/11/2013

Graduated

Rathangan High School 12/12/2009

#### PROFESSIONAL MEMBERSHIPS

None

#### IT SKILLS & LANGUAGES

- Include details of all IT skills and software knowledge you have to offer potential employers. Example: IT Skills: Wordpress, AutoCad, Microsoft Office: Word, Excel, PowerPoint, Outlook and Explorer.
- List languages and competency level – conversational, fluent, mother tongue etc.

#### INTERESTS

I have interests in sculpting and modelling, having handmade miniatures using modelling clay and soft wax, and animation and the technical aspects behind it, such as rendering, resource management and movement.

I would like to combine my modelling hobby with 3D printing and scanning technology to put my creations into a 3D rendering and sculpting software tool to refine the detail on them.
